### **Part III DETAILED ACTION**

#### ***Notice to Applicant(s)***

1. This application has been examined. Claims 1-8 are pending.
2. The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 2181.

#### ***Specification***

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

#### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

5. Claims 1-2, 6-7, 8 are rejected under 35 U.S.C. § 102(e) as being anticipated by Dunstan et al. (US No. 6,539,443).

In regard to claims 1, 6, 8, Dunstan et al. disclose the method for exchanging of data in messages between at least two users connected by a bus system and having separate time bases comprising the step of causing the at least two users to transmit data via the bus system in the messages (see col. 3, lines 24-33); driving the first user to control the message with the first timer repeatedly transmits a reference message (i.e. data message) including a first time information regarding the time base of the first user (see col. 4, lines 16-55); driving the second user to control the message with the second timer with a second time information regarding the time base of the second user (see col. 4, lines 16-55); ascertaining a correction value (i.e. negotiating value) from the first time information and the second time information; driving the second user to adapt to the correction value (see col. 4, line 40 through col. 5, line 3).

In regard to claim 2, Dunstan et al. disclose the step of subdividing the specific time interval into timing windows of the specificable length (see col. 4, lines 31-63); transmitting messages including the data in the timing windows (see col. 5, lines 15-42).

In regard to claim 7, Dunstan et al. disclose the omitting a cyclical message transfer in on timing window of one of the first cycle and a second cycle; and transmitting arbitrating messages in the at least one timing window.

***Allowable Subject Matter***

6. Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is an Examiner's statement of reasons for the indication of allowable subject matter: Claims 3-5 are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior arts which teach the step of combining the reference message and subsequent ones of the timing windows up to the next reference message to form a first cycle of at least one of the specificable length and a specificable structure, wherein the specificable structure corresponds to the specificable length, number and time position of timing windows in the specificable time interval following the reference message.

8. The remaining claims, not specifically mentioned, is allowed for the same reason as set for claim 3.

### ***Conclusion***

9. Claims 1-2, 6-8 are rejected. Claims 3-5 are objected.

10. The prior arts made of record and not relied upon are considered pertinent to applicant's disclosure.

**Dierauer et al. (US No. 6,442,708)** disclose a fault localization and health indication for a controller area network.

**Nakatsugawa (US No. 6,167,061)** discloses a transmitter, receiver, communication apparatus, communication method, communication system.

**Buhring (US No. 6,542,947)** discloses a data bus for serial data transmission.

**Grosshog et al. (US No. 6,487,620)** disclose a combined low speed and high speed data bus.

Art Unit: 2181

**Ewbank et al. (US No. 6,548,969)** disclose a redundant steer-by-wire system.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Raymond Phan, whose telephone number is (703) 306-2756. The examiner can normally be reached on Monday-Friday from 6:30AM- 4:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's Primary, Paul Myers can be reached on (703) 305-9656 or via e-mail addressed to paul.myers@uspto.gov. The fax phone number for this Group is (703) 746-7239.

Communications via Internet e-mail regarding this application, other than those under 35 U.S.C. 132 or which otherwise require a signature, may be used by the applicant and should be addressed to [raymond.phan@uspto.gov].

All Internet e-mail communications will be made of record in the application file. PTO employees do not engage in Internet communications where there exists a possibility that sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of 35 U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the Official Gazette of the Patent and Trademark on February 25, 1997 at 1195 OG 89.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 305-3900.
